## BUSINESS OVERVIEW

As a mortgage investment corporation, the Corporation is a non-bank provider of short term real estate finance. The Corporation generates interest, fees and income from investments in a portfolio of mortgage loans and generates stable dividends for shareholders.

The objectives of the Corporation are to: (i) preserve Shareholders' Equity; and (ii) to provide a return on Shareholders' Equity in excess of 400 basis points above the yield to maturity on one year Government of Canada treasury bills. The Corporation aims to provide shareholders with stable and secure cash dividends from investments in market segments which are under-serviced by large financial institutions and seeks to maximize yield and dividends through the sourcing and efficient management of its investments. To achieve these objectives, the Company benefits from Firm Capital Corporation's (the "Mortgage Banker") over 25 years experience in originating, underwriting, syndicating and servicing investments. All investments are subject to specific investment policies and the operation of the Company is subject to specific operating policies.

The Company currently pays regular monthly dividends of \$0.078 per Share. Each December a declaration is made for the excess undistributed income earned during the year and distributed to Shareholders. The company paid dividends to shareholders of \$1.006 per share for 2017, \$0.966 per share for 2016, \$0.991 per Share for 2015 and \$0.970 per Share for 2014.
