BUSINESS OVERVIEW

As a mortgage investment corporation, the Corporation is a non-bank provider of short term real estate finance. The Corporation generates interest, fees and income from investments in a portfolio of mortgage loans and generates stable dividends for shareholders.

The objectives of the Corporation are to: (i) preserve Shareholders' Equity; and (ii) to provide a return on Shareholders' Equity in excess of 400 basis points above the yield to maturity on one year Government of Canada treasury bills. The Corporation aims to provide shareholders with stable and secure cash dividends from investments in market segments which are under-served by large financial institutions and seeks to maximize yield and dividends through the sourcing and efficient management of its investments. To achieve these objectives, the Company benefits from Firm Capital Corporation's (the "Mortgage Banker") over 32 years of experience in originating, underwriting, syndicating and servicing investments. All investments are subject to specific investment policies and the operation of the Company is subject to specific operating policies.
